PROJECTS

Zac Harris Personal Website - [Project Link](#)
Portfolio website for a SaaS marketer where users can book meetings and read blog posts.
- Implemented SPA created with Gatsby.js, Figma , and Ghost CMS.
- Implemented SASS compile, creating a modern and pixel-perfect design.
- Optimized efficiency creating the application using a Desktop First approach for a user-friendly and responsive design.
- Integrated Ghost CMS Blog API to display blog entries from CMS.

Bio Bid
Bio Bid is a platform that connects clinical trial sponsors to the right service providers for their needs.
- Created with React.js, Bootstrap, and GraphQL.
- Collaborated remotely with a team of two UX/UI designers and one Back End Developer.
- Responsible for creating the bidding view/ table calling data from the backend displaying bids name, section, open, close and pending. Created a filter component where customers can filter through specific keywords to find the right trial.

WORK EXPERIENCE

Illinois Rocstar   Sep 2020 – Present
Front End Developer Intern   *Champaign, IL*
- Participated in a web development challenge creating an application to see 2D and 3D reservoir plots using Three.js.
- Learned Plotly. js, created the UI flow for the post-processing part of our project for users to upload their wellbore data, select type of plot, and display it in a user-friendly graph.
- Assisted Sr Developers with repo issues, bugs, and debugging test cases.
- Learned the main points for accessibility issues within our application Simverse and modified styles and applying accessibility requirements.

The Original Pancake House   Aug 2019 - April 2020
Server   *Champaign, IL*
- Consistently exceeded sales goals by efficiently managing sections and multi-tasking.
- Worked in a high-paced environment.
